# 1413 Psoriasis Vulgaris Complex

*There are four disorders that fall under the heading of Psoriasis: Psoriasis Vulgaris (or Plague Psoriasis), Guttate Psoriasis, Pustular Psoriasis, Inverse Psoriasis and Erythrodermic Psoriasis. Psoriasis vulgaris accounts for 82.6%–97.1% of all psoriasis patients. More than 90% of patients with Psoriasis are classified as mild or moderately severe.*

*The 1413 Psoriasis Vulgaris Complex is a naturopathic solution used in treatments of Psoriasis Vulgaris, the most common form of Psoriasis. The complex has shown high efficacy in treatments of even complex and severe cases of Psoriasis Vulgaris. The success rate of the treatment is close to 100%; with exception of rare cases where patients were allergic to the medication, all patients were practically cured within a period of 1 or 3 months. The term cure in this content indicates that the disease was completely removed and did not come back for a minimum period of 2 years.*

*In reality, the disease either does not come back for a typical period of 4 or 5 years (oldest cases are 7 years). The disease may come back in rare cases, but it is always in a very mild form (only one or few red dots and never more than 1% of the original skin surface before treatment). In such cases, new cell signaling medication is easily applied to quickly remove the red dots.*

# ADMISSION

*Before you decide to use the 1413 Psoriasis Vulgaris Complex, please provide the following information to your doctor:*

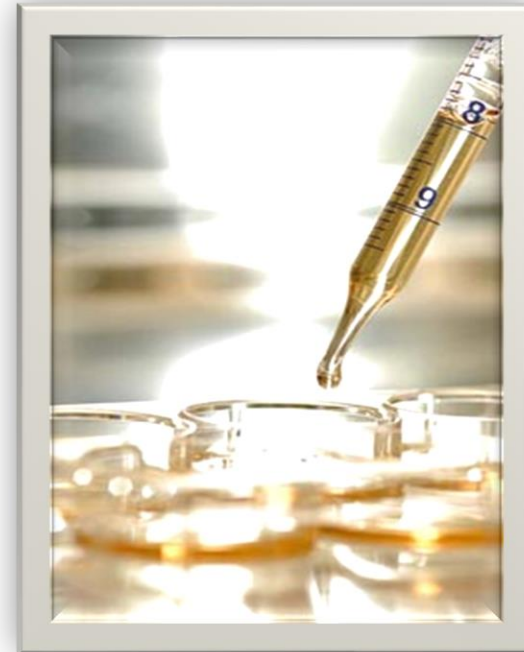

- *Complete the Psoriasis Vulgaris Treatment Assessment Form.*
- *Pictures of all patches of skin affected by Psoriasis Vulgaris on your body.*

***Additional useful information:***

- *History of present illness (onset, first symptoms).*
- *Exact diagnosis.*
- *Instrumental findings (ultrasound of the abdomen and X-ray findings if you have joint and back pain).*
- *Laboratory findings (complete blood count, blood chemistry, urine test) for the last month.*
- *Treatment in the past, present medications.*

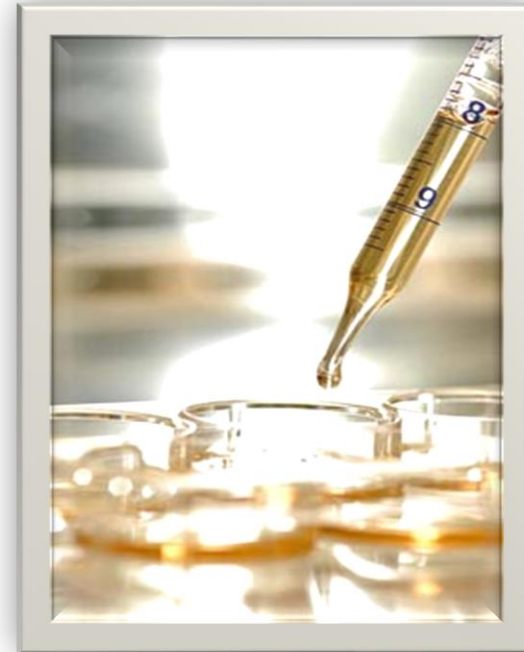

# BEFORE YOU START

- *The active ingredients of the medication always drop to the bottom of the bottle. In addition, the medication is thick and dense, and appears in a form of balsam. To ensure that the healing particles are spread all over, it is important to properly stir the entire content of the bottle before each and every application.*
- *During treatment, do not scratch or peel the layers of dead skin. Let the dead and damaged skin fall on its own.*
- *After the first application, you will immediately notice that the medication is working immediately; you will feel a burning sensation. This burning is strongest at day 1, and with time will completely disappear. Do not worry, this is a normal behavior. After few days, the psoriasis patches and the red skin will start to break and fall down and will be replaced with a healthy and fully functional skin.*
- *Best time to use the complex is at night, before bedtime. Since you need to keep the spread of the medication for 8 hours, you may consider using old pajamas.*

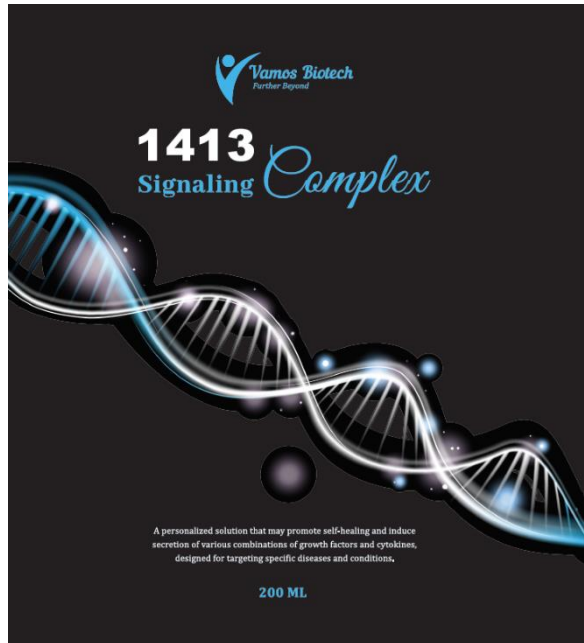

# BEFORE YOU START (cont)

- *Some clients find the smell of the medication unpleasant. If this is the case, please be patient and follow; this is an amazing treatment with astonishing results that are noticeable from day one. At the end of the treatment, you will be free of psoriasis for many years to come.*
- *During treatment, the client should put its best effort to reduce or keep stress to minimum, and eat healthy (NO MEAT, no chilly or fats, and no superficial drinks during treatment).*
- *You do not need hospitalization or visits to a doctor. Use the 1413 Psoriasis Vulgaris Complex in the comfort of your home. It is as simple as that.*

# APPLICATION

1. *Best time to use the complex is at night, before bedtime.*
2. *Warm up the bottle by placing the bottle in a pot filled up with a hot water for 5 minutes before each application, where the water is around 60 degrees Celsius. This will warm the bottle and the substance inside enough and make it less dense so you can stir it.*
3. *Stir the content in the bottle to make sure that all healing particles are well spread all over the content in the bottle. To stir, you can either turn the bottle upside down up to 10 times or otherwise use a teaspoon.*
4. *Apply a layer of the substance gently on all psoriasis patches that you have on your body. Gently rub the substance on your skin 5 or 6 times.*
5. *Leave the applied substance on your skin for 8 hours.*
6. *To remove the layer of the applied substance from your skin, use gauze and Ethanol alcohol (it should be at least 96% pure alcohol). Apply the alcohol on the gauze, then gently remove the layer of the substance from your skin. In addition to Ethanol, you can also use olive oil, but it is less effective.*
7. *When you shower, you must make sure that you use exclusively soap for kids that does not irritate the skin, has a pH of 5.5 and does not contain any type of sodium or other substances that can potentially irritate the skin.*

# SCHEDULE

- **First 15 days:**  
*Apply the spread every night.*
- **Day 16 to day 30:**  
*Apply the spread for 2 consecutive days, then skip one day, then again apply the spread 2 consecutive days and keep going.*
- **Day 31 to day 60**  
*Apply the spread every second day.*

# DURATION OF USE

*The actual duration of the treatment depends on the degree and severity of the Psoriasis Vulgaris.*

*In cases where Psoriasis Vulgaris affects below 5% of the body, the treatment typically lasts between one and two months. Cases where Psoriasis Vulgaris affects up to 25% of the body typically last between 2 and 3 months. Other cases of Psoriasis occupy more than 25% of the body could last between 3 and 4 months, depending on the affected skin surface and the actual health of the client.*

*The treatment is considered complete when the psoriasis patches disappear completely and are replaced by a new and fully functional skin.*

## **POST TREATMENT:**

*Apply the complex once a week, for a period of 2 months.*

# QUESTIONS & ANSWERS (1)

***How many cases have you already treated?***

*Over 1,300 clients in EU have successfully used the 1413 Psoriasis Vulgaris Complex for the treatment of Psoriasis Vulgaris (also known as Plaque Psoriasis).*

***What do you mean by cure?***

*In medical terms, the definition of a cure means that the disease or the condition the patient suffers from has been completely removed and the disease or the condition does not come back for a minimum period of 1 year. Some medical practitioners extend this period to 2 years.*

*Regarding treatments, all patients have been free of Psoriasis Vulgaris typically for a period of 5 years. In rare cases, the Psoriasis Vulgaris did come back after the 5-year period, but in a very mild form; typically, only one or few dots reappeared. They are easily and quickly removed by reapplying the medication under maintenance protocols.*

***Did you have cases where the treatment was unsuccessful?***

*The efficacy of the 1413 Psoriasis Vulgaris Complex in treatments of Psoriasis Vulgaris is close to 100%. All clients that have taken the treatment were successful, with exception of patients who attempted but were unable to achieve results because of allergies on the substances used in the preparation of the 1413 Psoriasis Vulgaris Complex (or pollen).*

# QUESTIONS & ANSWERS (2)

***Can anyone use the 1413 Psoriasis Vulgaris Complex?***

*The product is not recommended to people who are allergic to plants, resin, or bee related products. In this case, the clients may experience minor allergies. The allergies are not strong, the skin becomes red and starts to burn lightly. There is no need for any intervention, main issue in such cases is that the medication does not work, and you should disconnect the treatment.*

***How much of the complex do I need to complete the treatments?***

*The amount of the complex required for a treatment of Psoriasis Vulgaris depends on the percentage of the body affected by Psoriasis Vulgaris. For most clients, the % of the body area affected by Psoriasis is up to 10% in which case you will need one or two bottles. If on the other side, 75% or more % of the body is affected, you are likely to need 3 to 4 bottles. In a worst possible scenario, 4 bottles are sufficient to treat a patient that has psoriasis patches on the entire body.*

# QUESTIONS & ANSWERS (3)

***Is the complex effective for other skin conditions (eczema, rosacea, etc.)?***

*In addition to psoriasis, the 1413 Psoriasis Vulgaris Complex is effective against a number of related skin conditions and diseases such as eczema, decubitus, pimples, scars, herpes, hemorrhoids, spots, stains on skin, seborrhea, rosacea, dandruff. This is personalized medication and is prepared personally for each patient based on the actual condition of the disease and condition of each patient.*

***Does this medication work for other types of psoriasis?***

*This 1413 Psoriasis Vulgaris Complex was developed particularly for Psoriasis Vulgaris (Plaque Psoriasis). We have not attempted to treat other types of psoriasis so far.*

***Does Psoriasis ever come back after treatment?***

*Yes, it is possible for Psoriasis Vulgaris to come back after treatment, but it is very unlikely. If it does reappear, it is typically after many years and never more than 1% of its original size, often in a form of one or few red dots. Factors that may influence the return of psoriasis (or create new psoriasis) are stress, unhealthy food such as fats, oily, chilly or very salty foods, soft drinks.*

# QUESTIONS & ANSWERS (4)

*What factors contribute to the return of Psoriasis Vulgaris?*

*The following are the most important factors that can contribute towards a return of Psoriasis Vulgaris:*

- *Food: Avoid chilly, salty foods, processed meat (such as bacon and sausages), red meat, dairy products and all artificial drinks – drink water instead. We strongly recommend gluten free diet. We strongly advise that you take our Food Intolerance Screening test that screens over 220 types of food and detects all types of foods that you are allergic to and are very likely to have strong influence on your Psoriasis condition.*
- *Showering and Washing body & hands – Always use soap and bath for kids and infants that do not damage your skin.*
- *Stress – Remain relaxed at all times and avoid stressful situations.*
- *Sunbath – go under the sun for up to 30 minutes a day whenever possible.*

# QUESTIONS & ANSWERS (5)

## ***What causes psoriasis?***

*While the exact cause of psoriasis isn't fully understood, scientists believe psoriasis is the result of several factors, including the immune system. When you have psoriasis, your immune system is overactive. This creates inflammation inside the body, which is a cause of the symptoms you see on the skin. We believe that Psoriasis is tightly linked to bacteria in the liver. Based on our experiences, liver stem cell rejuvenation with fetal stem cells greatly repairs the liver and helps reduce or eliminate further re-occurrences of Psoriasis.*

## ***Can skin cancer be mistaken for psoriasis?***

*People may sometimes confuse plaque psoriasis with skin cancer. Distinct types of psoriasis and skin cancer cause different symptoms. Some can look similar, but there are ways to tell them apart. ... Erythrodermic psoriasis leads to inflammation and redness throughout the body, and it can cause the skin to peel away.*

## ***Can psoriasis lead to skin cancer?***

*Psoriasis is a chronic skin condition that can cause scaling and inflammation. Psoriasis is often said to be “autoimmune-mediated,” meaning it's triggered by an abnormal response of the body's immune system. Researchers have found that psoriasis may increase your risk of developing certain cancers*

# QUESTIONS & ANSWERS (6)

***What if I have skin cancer?***

*In this case, immediately contact us for free consultation. We are one of the few institutions worldwide that successfully treat and cure skin cancer on all extremities.*

***Can I take this treatment if I am pregnant or breastfeeding?***

*We do not take patients who are either pregnant or breast feeding.*

***Who else is not allowed to take this treatment?***

*Besides pregnant and breastfeeding woman, we do not allow treatments for patients with serious diseases such as serious heart problems, varicose veins, open wounds, and other serious other chronic diseases or patients whose health is severely deteriorated.*

*Kids below the age of 13 are also discouraged to take treatment, although treatments of small patches of Psoriasis Vulgaris (up to 3 square centimeters in size) are allowed under supervision of our medical team.*

*Treatments of patients whose health is compromised may also be allowed, subject to assessment and acceptance of our medical team and under supervision of our team.*

# QUESTIONS & ANSWERS (7)

## ***How are severe cases of Psoriasis Vulgaris treated?***

*If the total affected surface of Psoriasis Vulgaris affects 25 % of the body or less, the standard treatment schedule applies. In this case, the patient should apply the medication on all patches affected by Psoriasis Vulgaris as per the standard schedule.*

*If the total affected surface of Psoriasis Vulgaris is between 50 and 60 % of the total body, the medication is applied only on one side of the body each day. This increases the total amount of treatment time.*

*If extremely severe cases of Psoriasis Vulgaris where psoriasis affects the entire body, the medication is applied to only 25% of the psoriasis area at any given time. Time increases the time of the treatment 4 times.*

# CASE STUDY

*In this section, we present a case of a patient who suffered from Psoriasis Vulgaris for over 35 years prior to contacting us.*

*During this time, he tried every possible Psoriasis treatment, including Biological Therapy in Switzerland and each time the result was only partial or the disease immediately came back and in stronger form.*

*The patient was treated with the 1413 Psoriasis Vulgaris Complex in 2013 and is free from the disease since the completion of the treatment in 2013.*
